

IV INTERNATIONAL CONFERENCE END STAGE LUNG DISEASES (ESLD)

Focus on: Suppurative diseases

February 27-28, 2020
Palazzo del Bo' - Aula Nievo
Padova, Italy

PRESENTATION OF THE COURSE

The 4th International Conference on End Stage Lung diseases (ESLDs) will take place in Padova, Italy, on February 27-28, 2020.

Based on the success of the previous editions, the scientific organizing committee is excited to launch its 4th theme-based scientific conference.

The ESLD conference is a forum of national and international experts who aim to share experiences and outline best management for patients. The ESLDs focus on progressive lung diseases potentially requiring lung transplantation and this year the main theme will be Cystic Fibrosis (CF).

The efforts of all transplant specialists are directed towards the improvement of the very complex transplant management of these usually young patients.

The novelty of this edition is not only a wide involvement of all the specialists (psychologists, endocrinologists, pneumologists, surgeons, pathologists, immunologists) who play a crucial role in the diagnostic/therapeutic process, but also the participation of patient and family associations.

PRESIDENT

Federico Rea (University of Padova)

SCIENTIFIC COMMITTEE

Fiorella Calabrese (University of Padova)

Emanuele Cozzi (University of Padova)

Marco Schiavon (University of Padova)

Francesca Lunardi (University of Padova)

Monica Loy (Padova University Hospital)

Andrea Dell'Amore (Padova University Hospital)

Marco Damin (Padova University Hospital)

ORGANIZING SECRETARIAT

OVER GROUP

via Pagliari, 4 - 26100 Cremona

February 27, 2020

8.30 Registration

9.00 Welcome Address

Federico Rea, Director of the Department of Cardiac, Thoracic, Vascular Sciences and Public Health (University of Padova)

Rosario Rizzuto, Rector (University of Padova)

Stefano Merigliano, President, School of Medicine (University of Padova)

Luciano Flor, General Manager of University Hospital of Padova

Massimo Cardillo, Director of National Transplant Center

Giuseppe Feltrin, Regional Transplant Coordinator

Focus on suppurative lung disease

(Chairs: M. Sietta -P. Tarsia)

9.30 Cystic fibrosis: what's new in clinical and epidemiological scenario (C. Castellani)

9.45 Bronchiectasis: pathophysiology and new perspectives (F. Meloni)

10.00 Rare forms: how to see out of the lungs (15) (E. Baraldi)

10.15 Case base learning (M. Damin)

10.35 Discussion

10.45 Coffee break

The Cystic fibrosis centers

(Chairs: S. Quattrucci - A. Manca)

11.15 The Italian and Veneto map (*M. Cipolli*)

11.35 Adult patient vs pediatric: are they only grown-up? (*M. Ros*)

11.55 My thoughts, my feelings, my criticisms: the center seen by the patient

12.15 *Discussion*

12.30 Lunch

Turba medicorum around the patient

(Chairs: E. Delfino - C. Braggion)

13.30 Old and new infections in septic lungs: how to deal, how to treat (*F. Grossi*)

13.50 The metabolic abnormalities in pediatric and adult patients (*V. Grancini*)

14.10 Psychological issues (*C. Giust*)

14.25 Case base learning: the infection.... The nightmare (*S. Marinello*)

14.40 *Discussion*

When the lungs fail

(Chairs: F. Meloni - P. Vitulo)

14.50 To list or not to list: the referral to the transplant center (*S. Hirschi*)

15.10 The lung allocation system in Italy: tips and pitfalls (*M. Cardillo*)

15.30 How the immune system can be evaluated (*E. Cozzi*)

15.50 *Discussion*

16.00 Coffee break

16.30 Lecture: New surgical strategies in septic patients (*D. Van Raemdonck*)

Lung transplantation

(Chairs: F. Rea - F. Venuta)

17.00 Case base learning: When to consider double transplantation (*F. Ius*)

17.20 The Italian experience: Rome, Milano and Padua (*F. Rea, M. Nosotti, F. Venuta, M. Colledan, M. Rinaldi, S. Pelenghi, F. Parisi. P. Paladini, A. Bertani*)

17.50 *Discussion*

18.20 **Closing and cocktail**

February 28, 2020

Post-transplant complications

(M. Loy - D. Levine)

8.30 CMV and other post-transplant infections (*P. Solidoro*)

8.50 PTLD and other cancers (*M. Goddard*)

9.10 Cellular and Antibody-mediated Acute rejection (*D. Levine*)

9.30 Re-transplantation in cystic fibrosis: a new opportunity? (*G. Warnecke*)

9.50 *Discussion*

10.10 Lecture: CLAD phenotypes (*G. Verleden*)

10.40 Coffee break

New insight into suppurative disease

(M. Maschio - Cozzi)

11.10 How to collect the biological specimens for research (*F. Lunardi*)

11.30 Cystic fibrosis cellular line development for research (*L. Galiotta*)

11.50 What's new in chronic rejection: the OMICS technique (*F. Calabrese*)

12.10 *Discussion*

12.30 The Italian League for Cystic fibrosis meet the expert:

what can I do for my patient?

13.30 Closing remarks
